### DETAILED ACTION

This Office action is in response to the amendment filed March 5, 2003.

1. The rejection under 35 U.S.C. 102(e) over NOZAKI et al '713 is withdrawn in view of the arguments by application wherein the prior art lacks the substituted groups as claimed for R<sub>6</sub> and R<sub>7</sub>.

#### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-3, 5-11, 13-20, and 22-25 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 6-9 of U.S. Patent Application Publication No. 2002/0006576 A1. Although the conflicting claims are not identical, they are not patentably distinct from each other because the current and application said U.S. Patent Application Publication recite a compound capable of generating an acid upon irradiation with actinic rays or radiation, a resin capable of decomposing under the action of an acid to increase the solubility in alkali, containing a repeating unit having a group represented by the following formula (I) and a fluorine-containing and/or silicon-containing surfactant.

A grant to both applications would be patenting the essentially the same invention twice.

Art Unit: 1752

4. Claims 4, 12 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the prior art references of record disclose the claimed presence of a resin having the group of formula (I) and formula (a).
